internet solutions

## **Website Design Packages**

Your website is a direct representation of your business so it's important to choose a design that best captures the level of professionalism you are seeking. Square One offers several different design package options to suit your organizational and budgetary needs. All design packages include implementation of your company logo and color scheme of choice, or let our talented designer(s) decide for you!

Typically, projects take 1-2 weeks to complete after your content has been received. Each package starts with a certain number of webpages but additional pages can be purchased for a small fee of \$45-85 each. You can also choose to expand the functionality of your website with features in the future. You can see actual examples of these designs on our online portfolio at [www.squareoneinternetsolutions.com](http://www.squareoneinternetsolutions.com)
